| CapEx Intensity        | Capital Intensive |
| Capital Allocation     | Mixed             |
| Distress Flag          | False             |
| Deleveraging Flag      | False             |

## Pros & Cons

| PROS                                                                        | CONS                                                                        |
|-----------------------------------------------------------------------------|-----------------------------------------------------------------------------|
| • Strong ROCE indicates efficient deployment of capital.                    | • Negative free cash flow indicates cash outflow after capital expenditure. |
| • Low debt-to-equity indicates a relatively conservative capital structure. | • Low ROE indicates weaker returns generated on shareholder capital.        |
|                                                                             | • Low ROA suggests limited profitability relative to the asset base.        |
