Pros & Cons

| PROS                                                                           | CONS                                                                      |
|--------------------------------------------------------------------------------|---------------------------------------------------------------------------|
| • Strong interest coverage provides a comfortable buffer for debt servicing.   | • Negative three-year revenue CAGR indicates contraction in the business. |
| • Positive free cash flow indicates cash generation after capital expenditure. | • Low three-year revenue CAGR indicates subdued recent business growth.   |
|                                                                                | • Low three-year profit CAGR indicates subdued earnings growth.           |
|                                                                                | • Low ROCE indicates relatively weak efficiency in capital deployment.    |
